Pull request:			

Description

hammer-cli-katello extends some hammer-cli-foreman commands, namely host/hostgroups. We have faced several bugs in hammer-cli-katello that are caused by overriding the h-c-foreman behavior and lacking tests in h-c-katello that h-c-foreman tests. It'd be great if we could run the h-c-foreman tests during the h-c-katello tests to ensure h-c-katello doesn't break any Foreman resource commands.
