

## Katello - Bug #24116

### After adding a subscription to a manifest via upstream subs XUI, squished modal

06/29/2018 07:55 PM - Andrew Kofink

| <b>Description</b>  |                           |
| Reproduce:<br>1. In an organization with no RH subscriptions added to the manifest<br>2. XUI -> Subscriptions -> Add subscriptions<br>3. Add one subscription of any quantity   |                           |
| Expected:<br>UI looks 'normal', nothing is cut off, no unnecessary scroll bars, etc.  |                           |
| Actual:<br>See attached screenshot  |                           |
| I think this might be happening because the table is only one record long, and the modal progress bar is positioned below the bottom of the one-row table. It seems to look fine with no scroll bars and nothing cut off if you have more than one RH subscription in that table. |                           |
