Pull request:	https://github.com/foreman/foreman/pull/5862	
Description Reproduce: Hosts -> All Hosts Click a host Click the 'Hosts' breadcrumb link Expected: User is taken to all hosts index page Actual: Nothing happens, the link goes to the current host with a trailing octothorpe (i.e. https://foreman/hosts/centos7-katello-client.virbr0.akofink-desktop#) Seen in Katello nightly; I haven't tested if this is an issue in Foreman without Katello.
