Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1597086

Description of problem:

When user has selected "Any Organization" from the org picker, an error is thrown.

This is essentially a regression from the old UI, which would prompt user to select an Org before going any further on this page.

Note that I have not dug into any potential consequences of further workflows while in this state (uploading manifests, etc.)

Version-Release number of selected component (if applicable):
Satellite 6.4.0 snap 10

How reproducible:

Steps to Reproduce:
1. Create an Org or two, upload a manifest to one or more of these Orgs, etc.
2. In the context switcher, select "Any Organization"
3. Nav to the Subscriptions page

Actual results:
An error dialog reading...

Couldn't find organization ''

Expected results:

This page (and all related pages in the Subs workflow) should not be accessible if no specific org is selected.
