### Description

**Description of problem:**
When trying to edit the entitlement count for subscriptions, with unlimited guests, a loading spinner will run forever. This spinner blocks you from editing the number of entitlements for those subscriptions.

**Steps to Reproduce:**
1. Upload a manifest that has at least one subscription with unlimited guests.
2. Navigate to the subscriptions page.
3. Click one of the entitlement fields to load the edit input box.

**Actual results:**
A spinner replaces the entitlement count, and does not go away. This blocks you from editing the entitlement count.

**Expected results:**
The entitlement count edit field displays properly and you can successfuly edit the number.
