#### Description

In `operatingsystems_helper.rb`, the code has a case statement based on `record.name`, defaulting to `record.family` if there is no match.

For operating systems based on XenServer, this defaults to the value of "Xenserver" (lower case "s"). However, the image is named "XenServer.png" (upper case "S").

One workaround is this patch:

```
--- operatingsystems_helper.rb.orig 2018-07-03 16:33:15.763945937 0000
++ operatingsystems_helper.rb 2018-07-03 16:49:26.710467826 +0000
@ -43,6 +43,10 @
record.family
end

+ if family == "Xenserver"
+   family = "XenServer"
+ end

image_tag(family".png", opts) + " "
end
```

However, a better fix might be to rename the family to "XenServer".

I also wonder if the case statement should be based on `record.family`...
