Katello - Bug #24168

Registry Name Pattern feature needs helpful usage clues

07/05/2018 05:08 PM - Andrew Kofink

Status:	Closed		
Priority:	Normal		
Assignee:	Thomas McKay		
Category:	Lifecycle Environments		
Target version:	Katello 3.8.0		
Difficulty:		**Fixed in Releases:**	
Triaged:	Yes	**Found in Releases:**	
Bugzilla link:	1606360	**Red Hat JIRA:**	
Pull request:	https://github.com/Katello/katello/pull/7564, https://github.com/Katello/katello/pull/7597		

Description

In the lifecycle environments new/edit pages:

Actual:
User sees new field in a Lifecycle Environment, "Registry Name Pattern", which is blank by default. There is no indication of how to use the field or what it does.

Expected:
User is presented with the default registry name pattern ($org-$prod-$env-$cv-$name) as a starting point rather than default showing a blank field. Perhaps a tool tip would also be beneficial.
