Pull request:	https://github.com/foreman/foreman/pull/5825	

Description

Description

Editing a http proxy with a dot in the *name* (not URL) results in a "The page you were looking for doesn't exist."

How reproducible:

Every time

Steps to Reproduce:

1. Go to https://katello.example.com/http_proxies
2. Make a new HTTP proxy
3. Name it with a fqdn in the **Name** field (example: proxy.example.com)
4. Fill out URL and press Submit
5. Click on proxy.example.com

Actual results:

```
The page you were looking for doesn't exist.
You may have mistyped the address or the page may have moved.
If you are the application owner check the logs for more information.
```

Expected results:

Should be able to edit the proxy

Additional info:

production.log shows:
