| <b>Description</b>   |                           |
| Description of problem:<br>There appears to be a limit to the number of subnets that can be added to a domain in the web ui. |                           |
| Version-Release number of selected component (if applicable):<br>Satellite 6.3.2   |                           |
| How reproducible:<br>Reproducible with 25 or more subnets.   |                           |
| Add a large number of subnets to a domain in the Webui, receive error  |                           |
| Steps to Reproduce:<br>1. Add a large number of subnets to a domain in the Webui, receive error                              |                           |
| Actual results:<br>receive error, no subnets added to domain   |                           |
| Expected results:<br>Subnets should be added to domain   |                           |
