

Katello - Bug #24210

Katello certs must be readable by foreman user

07/09/2018 02:04 PM - Stephen Benjamin

Status:	Closed	
Priority:	Normal	
Assignee:	Stephen Benjamin	
Category:	Installer	
Target version:	Katello 3.7.0	
Difficulty:		Fixed in Releases:
Triaged:	Yes	Found in Releases:
Bugzilla link:		Red Hat JIRA:
Pull request:	https://github.com/theforeman/puppet-certs/pull/204	
Description		
This is a regression. At some point group ownership of the certs changed from foreman to root. Foreman's VNC console will not work because the foreman user launches the websockify process.

Revision 677a47e7 - 07/09/2018 03:00 PM - Stephen Benjamin

fixes #24210 - certs group must be overridable (#204)

For Katello, we override the certs ownership so Foreman can read it. This is required for WebVNC: the foreman user launches websockify using the certificate.
