

Foreman - Bug #24232

Non admin user is unable to see the audits for katello and taxable resources created by admin using Any Location context

07/12/2018 06:31 AM - Marek Hulán

Status: Closed	
Priority: Normal	
Assignee: Sebastian Gräbl	
Category: Audit Log	
Target version:	
Difficulty:	Fixed in Releases: 1.21.0
Triaged: No	Found in Releases:
Bugzilla link: 1600095	Red Hat JIRA:
Pull request: https://github.com/foreman/foreman/pull/6073 , https://github.com/foreman/foreman/pull/6251 , https://github.com/foreman/foreman/pull/6319	
Description Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1600095	
Description of problem: unlike Admin, a regular user is not able to effectively use "Any Location" context on accessing Katello resources. So if Admin user creates a katello resource while having "Any Location" context set, audits for these actions and resources will not be visible to a regular user.	
Version-Release number of selected component (if applicable): 6.4.0-11	
How reproducible: always	
Steps to Reproduce: <ol style="list-style-type: none">1. create an organization (o1)2. clone the "Auditor" role and assign the clone to the org (o1)3. create a regular user (u1), belonging to org (o1), having "Org Admin" and the auditor clone roles assigned.4. as an Admin user, set your location context to Any Location and organization context to o15. as an Admin user, create some katello resource (e.g. content view) OR architecture.6. optional: as admin, check that the audits have been created7. as u1, check the audits	
Actual results: u1 is unable to see any audits related to the resources created manipulated in step #4 despite the fact that these belong to his organization.
