| <b>Description</b><br>We need a volunteer who could review English translation (locale/en/foreman.po). We need to "translate" all strings with keys in the format of<br><br>msgid "Hostgroup Root pass"<br><br>These keys are used in all forms and table headers. By default, only the last element is rendered ("Root pass" in this case) which is not correct in all cases (in this case we want "Root password").<br><br>All these keys are marked with the following comment:<br><br>#. "Table name" or "Table name Column name" for error messages |                           |
