Pull request:		
Description		
<p>When editing a Host, you can select a class from the Available class list and add it to Included classes.</p> <p>However, when you click on the Included classes to remove a recently added class, the class name does not reappear in the "Available Classes" list.</p> <p>You have to undo your changes by reloading the page to see the class again in Available class.</p> <p>Also, when a Class is removed from the Included Classes list, there is no visual clue as to which class was just removed.</p>
