

## Foreman - Bug #2453

### Host list doesn't show deep hostgroup hierarchies

05/03/2013 04:58 AM - Dominic Cleal

<b>Status:</b> Closed

<b>Pull request:</b>	
<b>Description</b>	
<p>I think this is a 1.1 to 1.2 regression - the hostgroup column in the main host list is shortening long hostgroups rather aggressively. This means relatively small hierarchies, such as "Base/builders/redhat" in our own infra are shortened to "Bas...redhat".</p> <p>There is free whitespace in other columns, e.g. last report and hostname which would be nice to reclaim for this. Else, it would be good to have a tooltip at least on the hostgroup cell to show the full title.</p>

Ok let's see :)

##### #2 - 05/07/2013 10:20 AM - Lukas Zapletal

- Assignee changed from Lukas Zapletal to Dominic Cleal

So I can confirm trimming works as expected (?) It does trim at 26 characters, when subhostgroup is used it properly (?) trims in the "middle" and when I hover on the link I can see the whole name.

Putting back to Dominic than. Not sure what is wrong here. Maybe some combination of string and browser width that made a wrap or something?

##### #3 - 05/07/2013 10:33 AM - Dominic Cleal

- Status changed from Assigned to Feedback

##### #4 - 05/10/2013 05:11 AM - Dominic Cleal

- Status changed from Feedback to Ready For Testing

I've narrowed it down.. I've got a host group whose label is 20 characters ("Base/builders/redhat") so it's within the 26 character limit, but the parent host group part of the label was being truncated when it shouldn't have been.
