Description

With the new update of Settings code, the possible options are not loaded in production at first run.

Proposed fix:

https://github.com/theforeman/foreman/pull/574

Associated revisions

Revision 05921293 - 05/07/2013 03:13 AM - Ivan Necas

Fixes #2454 - Fix loading settings in production

The Setting subclasses are not preloaded in initialization phase in
production.

Also (if Setting.first rescue (false)) is not satisfied when the
settings are not set yet. Using table_exists? instead.

Also, define constants before audited So that the constants are available even
when not migrated yet.
