Description

When you were logged previously and you session expired and you come from Signo for the first time, you see warning that session has expired resulting in logout action. To login again you must reenter '/' url. We should set expiration in future immediately after successful Signo login.

Revision afe65aab - 05/09/2013 03:21 PM - Marek Hulán

Fixes #2460 - session expiration fix for SSO

We set new expiration interval when user logs in successfully using any kind of SSO. Also this patch moves logout path out of thread variable and stores it into a session. This is more secure storage for threaded servers.

History

#1 - 05/09/2013 05:06 PM - Marek Hulán

- Status changed from Assigned to Closed

- % Done changed from 0 to 100
