Description

Description of problem:
Users are not assigned to organizations and locations when 'All users' checkbox is checked, but the taxonomy edit page looks as if they were. When the 'All users' checkbox is checked, the items stay in their lists and do not move to the one on the right.

Steps to Reproduce:

Step 1: Create several users
Step 1: Administer -> Organizations
Step 2: Pick Organization to modify
Step 3: Users Tab
Step 4: check the 'All users' checkbox. Both 'All items' and 'Selected items' will get disabled, but items in the left list will stay there and will not be moved to the righ list (they will display correctly when the page is revisited after submission)
Step 5: Submit
Step 6: Administer -> Users -> click user name -> Organizations tab
Step 7: Note user does not have any organization
Step 8: Create a new user that should be automatically added to org, but that will not happen

History

#1 - 09/11/2018 02:12 PM - Marek Hulán

*- Subject changed from Adding all users to Taxonomy does not work
 to Adding all users to Taxonomy does not work*

- Status changed from New to Need more information

Note this options does not effectively add associations, just modifies some if conditions. Proper fix was being worked on by Kavita - https://github.com/theforeman/foreman/pull/4111 perhaps this is a dup of #6150
