Difficulty:	trivial		**Fixed in Releases:**	1.20.0
Triaged:	No		**Found in Releases:**	
Bugzilla link:	1629564		**Red Hat JIRA:**	
Pull request:	https://github.com/theforeman/foreman/pull/6077			

Description

When visually searching a large number of parameter overrides, it can be
confusing when the elements are not listed in a predictable order.
Currently the elements are sorted by Matcher Type. While this is very
helpful, for one specific class customer has nearly 100 FQDN based overrides.
If the elements could be sub sorted by matcher value (fqdn ==
matcher_value) this would significantly reduce the time spent reviewing
the list.
