Foreman - Bug #25039

No Audit entries found if you selected the Organization filter.

Description

We have used the Organization in Foreman and we just upgraded the Foreman to 1.18.2.

If I selected the Organization filter to "Any Organization", I can view all of the hosts and view the Host audit entries by click the Audits button.

If I selected the Organization filter to any specific Organization, I can view all of the hosts but can't view the Host audit entries by click the Audits button.
https://foreman/hosts/server_name/audits shows "No entries found"

The issue is the same with https://projects.theforeman.org/issues/24232. I can fix this bug with the solution.

#3 - 10/03/2018 07:54 AM - Marek Hulán

This will only work properly in 1.20, audits now inherit taxonomies from resources that are also taxable (e.g. by organization) and audits page reflects that. The change is too big to backport to 1.18/1.19. The workaround should be to look at the page under admin user in any context, that should always give you all audits.

Can we close this as dup of #24232?

#4 - 10/03/2018 08:00 AM - Chun-Liang Lin

My workaround is to remove the with_taxonomy_scope in app/controllers/audits_controller.rb now.
Yes. we can close it. Thanks.

- Status changed from New to Duplicate

yeah that would help, thanks, closing
