Foreman - Bug #25040

[Module Stream] - Adding stream/version information at breadcrumb switcher icon on module streams details page

09/26/2018 06:12 AM - Omkar Khatavkar

Status:	New		
Priority:	Low		
Assignee:	John Mitsch		
Category:	Web Interface		
Target version:			
Difficulty:		**Fixed in Releases:**	
Triaged:	No	**Found in Releases:**	Katello 3.10.0
Bugzilla link:		**Red Hat JIRA:**	
Pull request:			

Description

Steps
1. Navigate to Module Streams Details Page.
2. Click on breadcrumb switcher Icon
3. See the list of modules (some of them has the same name as nodejs, nodejs, nodejs)

more info :
https://github.com/Katello/katello/pull/7718

Expected Result
If we are listing modules, adding version/stream could help the user to identify the which module he wanted to click.

Actual Result
Currently, the user does not have the advantage of selecting a module from the breadcrumb switcher icon as there are multiple modules with the same name

History

#1 - 09/26/2018 02:50 PM - John Mitsch

- Project changed from Katello to Foreman

- Category changed from Web UI to Web Interface

This bug is asking for the ability to customize what each object is represented as in the breadcrumb switcher, i.e. name + version rather than just name. this comment shows a screenshot with some details https://github.com/Katello/katello/pull/7718#issuecomment-424390475

Moving this to foreman since this seems like would require an update to the breadcrumb components.
