

Installer - Bug #2505

Installer shouldn't configure shared storeconfigs any more

05/17/2013 02:04 PM - Dominic Cleal

Status: Closed	
Priority: Normal

Pull request:	
Description	
The installer should not configure Foreman to use a shared database at all in anticipation of Foreman 1.2. It's still reasonable to support configuring Puppet's storeconfigs setting, but it shouldn't allow users to create a shared configuration.
