

Foreman - Bug #25052

db:migrate from 1.17 to 1.19 fails if table table_preferences already exists.

Description	
<p>I have a foreman setup running 1.19 where I imported a database from a machine running foreman 1.17. After importing the database I ran /usr/sbin/foreman-rake db:migrate to update the database to 1.19, this failed with the error "Mysql2::Error: Table 'table_preferences' already exists".</p> <p>Since table_preferences was empty I dropped the table and re-ran the migration, this time without issues. The migrate script should not fail if the table is already present.</p>

- Status changed from New to Rejected

Support for MySQL is being dropped in Foreman 2.0. Please migrate to PostgreSQL - see <https://theforeman.org/2019/09/dropping-support-for-mysql.html> for more details.
