

Foreman - Bug #2579

Host groups with puppet classes triggers: column 'id' in field list is ambiguous

05/28/2013 01:38 PM - Dominic Cleal

Target version: 1.2.0	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
When creating host groups with puppet classes or similar, AR doesn't supply the correct field name in the pluck when joining tables:	
2.0.0p0 :020 > Hostgroup.first.puppetclass_ids	
Hostgroup Load (39.7ms) SELECT `hostgroups`.* FROM `hostgroups` WHERE (1=1) LIMIT 1	
(37.6ms) SELECT id FROM `puppetclasses` INNER JOIN `hostgroup_classes` ON `hostgroup_classes`.`puppetclass_id` = `puppetclasses`.`id` INNER JOIN `hostgroups` ON `hostgroups`.`id` = `hostgroup_classes`.`hostgroup_id` WHERE `hostgroups`.`id` IN (1)	
ActiveRecord::StatementInvalid: MySQL::Error: Column 'id' in field list is ambiguous: SELECT id FROM `puppetclasses` INNER JOIN `hostgroup_classes` ON `hostgroup_classes`.`puppetclass_id` = `puppetclasses`.`id` INNER JOIN `hostgroups` ON `hostgroups`.`id` = `hostgroup_classes`.`hostgroup_id` WHERE `hostgroups`.`id` IN (1)	
This is only in 3.2.8 (RPMs), not 3.2.13 (source). Looks like: https://github.com/rails/rails/issues/5990
