Target version: 1.2.0	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description Creating a new Host in Foreman lets you select an organization and an environment. However, selecting an Organization does not filter the available list of environments within the selected org. I believe we should filter the environments selection based on the Org selected. https://bugzilla.redhat.com/show_bug.cgi?id=961378
