Target version:	1.2.0		
Difficulty:		**Fixed in Releases:**	
Triaged:		**Found in Releases:**	
Bugzilla link:		**Red Hat JIRA:**	
Pull request:			

Description

This may or may not be related to issue #2484 which has an open PR https://github.com/theforeman/foreman/pull/620

It seems that the encrypted string is encrypted again.

Updated, reset host pass to "redhat", in the database I see

1garyBwDK$G0nHxULu6/S0I/HwQVvjj1

then edited the host without touching the root pass and in the database I see different hash:

1SEHMugyD$mRciwoMy.i9mO08KS26c91

Provisioned the host, cannot login. :-(
