

Foreman - Bug #2619

BMC pane renders a full HTML error response from proxy BMC calls

06/05/2013 05:48 AM - Dominic Cleal

Status: Closed	
Priority: Normal	
Assignee: Marek Hulán	
Category: Web Interface	
Target version: 1.2.0	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
<p>My host has a BMC proxy assigned that's giving out a Ruby error response in HTML along the lines of:</p> <pre>LoadError at /bmc/10.1.1.1/chassis/power/status no such file to load -- rubyipmi</pre> <p>When I'm viewing the host page in Foreman, the BMC tab is rendering the full HTML response from the proxy inline. Since the proxy error response contains CSS too, this is creating a huge mess of the Foreman UI.</p> <p>Foreman probably shouldn't pass HTML errors along to the browser when the proxy fails.</p>	

Associated revisions

Revision a933fc25 - 06/13/2013 09:14 AM - Marek Hulán

Fixes #2619 - don't display full output from proxy

Proxy output is logged alongside with backtrace of exception. We display only exception message in UI.

Revision 70f272e0 - 06/14/2013 10:29 AM - Marek Hulán

Fixes #2619 - don't display full output from proxy

Proxy output is logged alongside with backtrace of exception. We display only exception message in UI.

I found similar: <http://projects.theforeman.org/issues/2622>

#2 - 06/07/2013 08:50 AM - Marek Hulán

- Assignee set to Marek Hulán

So the solution in here would be to either

- remove html or css from output
- wrap in `<pre >...</pre >`
- put it into iframe so css does not conflict (this one would preserve original look)

comments? thoughts? other suggestions?

#3 - 06/12/2013 06:49 AM - Dominic Cleal

I'd vote for (2), wrap it in pre.

#4 - 06/12/2013 07:44 AM - Marek Hulán

- Status changed from New to Ready For Testing

That would generate a lot of html code, backtrace was in table, here's a patch we agreed, just display exception message (e.g. 500 Internal server error)
