Foreman - Bug #26210

Locked Templates are getting removed by api

03/04/2019 07:52 AM - Ondřej Pražák

Status:	Closed		
Priority:	Normal		
Assignee:	Dominik Matoulek		
Category:	Templates		
Target version:			
Difficulty:	trivial	**Fixed in Releases:**	2.1.0
Triaged:	No	**Found in Releases:**	
Bugzilla link:	1680458	**Red Hat JIRA:**	
Pull request:	https://github.com/theforeman/foreman/pull/7572		

Description

Description of problem:
Locked template are getting deleted through API request

How reproducible:
Always

Steps to Reproduce:
1. Sat webUI>Monitor>Report Templates>Either pick any of the default template or clone and existing template(later is preferred)>Lock it
2. From the console, fire the below DELETE request-
$ curl -u admin:<pwd> -k -X DELETE https://<foreman-fqdn>/api/report_templates/<teplate-id> -H 'content-type: application/json'

3. API response returns the below error- {"errors":{"base":["This template is locked and may not be removed."]}}

Actual results:
API returns the error that suggests- the template is locked and may not be removed. However, it actually removes the template.

Expected results:
There is no option to remove the locked template from the webUI so, API should also not delete the locked template OR it should prompt to unlock the template before deleting. It will avoid the accidental deletion of locked template through the API.

- Difficulty set to trivial

this affects all template types. The reason is that the callback checking if the template is locked only adds an error but doesn't throw(:abort) to stop the destruction process.
