| Pull request: https://github.com/theforeman/community-templates/pull/561 | |
| Description | |
| <p>Whenever provisioning a VMware image based box, some extra parameters are necessary to configure the VMware backend in regards to the hostname and network configuration.</p> <p>This patch introduces the ability to enable a boolean parameter `vmware_image_provisioning` which will include the mandatory parameters specified at https://pubs.vmware.com/vi3/sdk/ReferenceGuide/vim.vm.customization.Specification.html to preconfigure the VMware template.</p> | |
