

Foreman - Bug #2633

local_secret_token.rb is zero bytes in RPM

06/07/2013 06:08 AM - Dominic Cleal

Status: Closed

Pull request:	
Description	
After an install of Foreman 1.2, the generated token file is zero bytes:	
<pre>----- 1 root foreman 0 Jun 7 06:27 /usr/share/foreman/config/initializers/local_secret_token.rb</pre>	
There's a fallback path where it creates ~foreman/tmp/secret_token instead, but ideally the static one should be generated.
