

Foreman - Bug #2640

Sign out button is missing protocol

06/10/2013 10:34 AM - Taylan Develioglu

Pull request:	
Description On 1.2RC2 Sign out url is missing the protocol prefix (http or https). This causes logout to fail when logged in on https and foreman is unavailable on http.

I don't this here, the link has a full URL including protocol. What appears in the link - only the path, only the hostname onwards?

#2 - 06/10/2013 10:42 AM - Taylan Develioglu

fqdn/users/logout

the my account link, for example, is [https://fqdn/users/...](https://fqdn/users/)

I can't reproduce. Also nothing in code suggests any nonstandard behavior. However this may be related to your setup if you're running foreman behind proxy. Rails detects HTTPS request behind proxy by various custom headers that your proxy probably does not attach. Make sure you are adding 'X-Forwarded-Proto: https' header correctly.

Although this is not entirely a bug we could change `logout_users_url` which generates absolute path to `logout_users_path` which generates only the relative part. This will fix the issue for users with wrongly configured proxy.

PR <https://github.com/foreman/foreman/pull/719>

#6 - 06/14/2013 07:34 AM - Taylan Develioglu

You are correct, we are running foreman behind proxy and the header is not added.

#7 - 06/14/2013 07:35 AM - Dominic Cleal

Would you mind giving the (very small) patch a try? Looks like it'll work to me.

#8 - 06/14/2013 07:40 AM - Taylan Develioglu

Yes, I tried it and it's fixed. The signout url now has https in it.
