Description

The devel/test packages in the Fedora 18 build are failing with a repoclosure issue. If we're going to build them (noting that we don't for EL6 with SCL), then the dependencies need sorting.

```
+ ./repoclosure.sh yum_f18.conf http://koji.katello.org/releases/yum/foreman-nightly/Fedora/18/x86
_64/ -l f18-base -l f18-updates -l f18-epel

Not using downloaded repomd.xml because it is older than what we have:
