Pull request:	
Description	
Would it be possible to incorporate the Smart-Proxy Realm Provider for Active Directory as a ready to go RPM package. So it can be installed via the foreman installer (easily on offline systems). https://projects.theforeman.org/issues/4917 https://github.com/theforeman/smart_proxy_realm_ad_plugin

- Status changed from New to Need more information

Doesn't need this plugin to be deployed on Smart Proxy running on Windows? How useful RPM package will be on that platform then?

#3 - 04/03/2019 03:42 PM - Jens Kofoed

The smart proxy which is already made: https://github.com/theforeman/smart_proxy_realm_ad_plugin

Is for a Linux server and connect to the Windows DC and interact with the active directory.

It can be installed on the Katello/foreman server directly.

So no need for programming a complete new proxy to be installed on a windows server when a proxy is already made.

The only request is to make it more easier to install.

#4 - 04/04/2019 10:17 AM - Lukas Zapletal

- Project changed from Smart Proxy to Packaging

- Subject changed from Incorporate Smart-Proxy Realm Provider for Active Directory as a Ready2Go RPM package to Create RPM package for smart_proxy_realm_ad_plugin

- Status changed from Need more information to New

- Triaged changed from No to Yes

Okay moving to packaging project.

#5 - 04/04/2019 12:13 PM - Ewoud Kohl van Wijngaarden

The steps would roughly be:

```
GEM_NAME="smart_proxy_realm_ad"
git checkout -b rpm/develop-add-$GEM_NAME
./add_gem_package.sh $GEM_NAME smart_proxy_plugin foreman-plugins-nonscl-nightly-rhel7
./add_host.py plugin_nonscl_packages rubygem-$GEM_NAME
```

```
git add package_manifest.yaml
git commit --amend --no-edit
git push -u $USER HEAD
hub pull-request -b rpm/develop
```

One thing to note is that https://github.com/theforeman/smart_proxy_realm_ad_plugin#building mentions you need to add gems, but the gemspec mentions 2 out of 3. For rkerberos it doesn't mention the minimum version. That should be fixed because the packaging process assumes the gemspec is complete.
