| Description | |
| Currently there's still a lot of code to support Puppet 3, but that's EOL. There's also some code for early 4.x versions that nobody should be using anymore. 4.4+ doesn't need any special version handling so that'll be the minimum new version. | |

Refs #26591 - Stub Rubyipmi.is_provider_installed?

With the removal of the Puppet gem, it looks like /sbin is no longer guaranteed to be in PATH. Since these tests shouldn't care about that, we can pretend by stubbing.

Revision 7e7015ab - 07/15/2019 12:59 PM - Ewoud Kohl van Wijngaarden

Fixes #26591 - Remove puppet_proxy_legacy (Puppet 3)

This drops legacy Puppet support and relies on the Puppet API to retrieve classes. This means at least Puppet 4.4 is required. Since Puppet 4 also removed puppet kick, that provider is removed as well.
