<b>Description</b>	
<p>A VM is created and a lease is assigned for some IP (1.2.3.4 with mac 00:01:02:03:04:05. When deleting the host, the proxy uses the following command to delete the host:</p> <pre>netsh dhcp server 1.1.1.1 scope 1.2.3.0 delete reservedip 1.2.3.4 00:01:02:03:04:05</pre> <p>This is incorrect and causes an invalid parameter error in netsh. The correct command removes the colons from the mac address -</p> <pre>netsh dhcp server 1.1.1.1 scope 1.2.3.0 delete reservedip 1.2.3.4 000102030405</pre> <p>This is correct and works as expected.</p>	

#### History

##### #1 - 06/12/2013 04:58 PM - Kal Aeolian

What's interesting is I see this in code in the delRecord method but I still get the error above -

```
mac = record.mac.gsub(/:/, "")
```

##### #2 - 06/12/2013 05:01 PM - Kal Aeolian

Please close this issue, I am a bit blind today and completely missed the error after too long of looking at a problem.... :(

##### #3 - 06/12/2013 05:21 PM - Dominic Cleal

- Status changed from New to Rejected

No problem :)
