| Description | |
| <p>Having an issue with Foreman 1.21. It would appear that no users, unless they are marked as admin, can view host facts or puppet classes tab.</p> <p>There are no errors, just a blank page for facts, and the Puppet Classes tab is greyed out. I have set the users and hosts to the same Org, same Location. Double checked filters and roles. They are all correct.</p> <p>Regardless of what I set, facts cant be viewed on the Hosts, nor can Puppet Classes, unless the user is an Admin.</p> | |

History

- Priority changed from High to Urgent

Still no resolution. Currently a pretty major security issue.

#2 - 04/18/2019 03:58 PM - Jeff Sparrow

- Priority changed from Urgent to Normal

Moved back to Normal now that I have a work around.

We use a Customized Viewer role. Its a duplicate of the Viewer role, but allows more options like editing and creating. However, for just viewing purposes, they are identical.

In the Customized Viewer role, I saw the Fact filter was not marked as Unlimited. When I marked it as Unlimited it would reset itself immediately after being set.

I simply added the viewer role on top of the Customized Viewer role, to our LDAP groups and now the Facts are visible.

Appears to be some issue with not being able to set the Fact filter to unlimited on custom roles.
