<b>Pull request:</b> <a href="https://github.com/theforeman/foreman/pull/6706">https://github.com/theforeman/foreman/pull/6706</a>	
<b>Description</b> When creating new OpenStack CR against OSP v13 a permission denied (401) error is returned. I have narrowed this down to the fact to missing flag <code>openstack_domain_id</code> . When it's provided, the CR authenticates fine, since it is mentioned as mandatory for V3 in <a href="https://github.com/fog/fog-openstack">https://github.com/fog/fog-openstack</a> this patch is going to add it.
