

Installer - Bug #26746

No visible progress during --upgrade-mongo-storage-engine

05/06/2019 01:58 PM - Chris Roberts

Status:	Closed	
Priority:	Normal	
Assignee:	Chris Roberts	
Category:	foreman-installer script	
Target version:	1.23.0	
Difficulty:	trivial	Fixed in Releases: 1.23.0
Triaged:	Yes	Found in Releases:
Bugzilla link:	1704816	Red Hat JIRA:
Pull request:	https://github.com/theforeman/foreman-installer/pull/352	
Description		
Description of problem: When running satellite-installer --upgrade-mongo-storage-engine, it will first dump the MongoDB database and then restore it with the new storage engine.		
While restoring, it runs mongorestore --host localhost --db=pulp_database --drop --quiet --dir=/var/tmp/mongodb_engine_upgrade/pulp_database		
And with --quiet there is zero output on the terminal. (There is during the dump phase). As this step can easily take multiple hours, it'd be nice to see some progress, even if it's as badly formatted as the one during the dump		
Version-Release number of selected component (if applicable): 6.5.0 Snap 26		
How reproducible: 100%		
Steps to Reproduce: 1. Install 6.3 (last one to default to MMAPv1 for new installs) 2. Upgrade to 6.4/6.5 3. satellite-installer --upgrade-mongo-storage-engine		
Actual results: No output during restore		
Expected results: Output during restore		
Additional info: Just removing the --quiet should be sufficient
