

Foreman - Bug #2706

Failed to import puppet environments using foreman-proxy

06/25/2013 05:31 AM - Myungjee Zhao

<div>Status:Rejected</div> <div>Priority:Normal</div> <div>Assignee:</div> <div>Category:Puppet integration</div> <div>Target version:</div> <div>Difficulty:</div> <div>Triaged:</div> <div>Bugzilla link:</div> <div>Pull request:</div>	<div>Fixed in Releases:</div> <div>Found in Releases:</div> <div>Red Hat JIRA:</div>
<div>Description</div> <div>I want to integrate puppet and foreman, so I install foreman, foreman-proxy and puppet-server. Below is the version number I installed in my puppet master machine.</div> <div>foreman-1.1stable-3.el6.noarch foreman-proxy-1.1stable-1.el6.noarch puppet-server-2.6.18-3.el6.noarch</div> <div>I have configured the below lines in my foreman-proxy configuration file. :puppet: true :puppet_conf: /etc/puppet/puppet.conf</div> <div>And I added two environments in my puppet.conf file as below.</div> <div>[DEVELOPMENT] modulepath = /var/opt/ActiveEnvironments/DEVELOPMENT/puppet/modules manifest = /var/puppet/site.pp</div> <div>[TESTING] modulepath = /var/opt/ActiveEnvironments/TESTING/puppet/modules manifest = /var/puppet/site.pp</div> <div>But when i issue the command 'rake puppet:import:puppet_classes RAILS_ENV=production', it always prompts the below info.</div> <div>Evaluating possible changes to your installation No changes detected</div> <div>I can get the environments from 'curl -k -H "Content-Type:application/json" -H "Accept:application/json" <a href="http://puppet:8443/puppet/environments">http://puppet:8443/puppet/environments</a> ==&gt; ["DEVELOPMENT","TESTING"], but no entry exists in the real database.</div> <div>All environments I configured should be existing in my database that is configured in /etc/foreman/database.yml file after i issue rake command. right?</div> <div>I have investigated this issue for a bit time and have no idea what the problem is. Could anyone give me some suggests?</div> <div>Any response will be much appreciated.</div>	

History

- Status changed from New to Feedback

- a) Do both of the environments contain modules and classes? Otherwise Foreman may not import them.
- b) It's not clear that you've checked the Foreman web UI under More->Configuration->Environments and Puppet Classes to see if the classes you're expecting are present.
- (I'd generally recommend using the import button on the Puppet Classes instead of the rake task)

c) Failing all of that, please check /var/log/foreman-proxy/proxy.log for errors.

Thanks for your quick response. There is no classes in my modules, so the import failed.

**#3 - 06/26/2013 02:50 AM - Dominic Cleal**

- *Status changed from Feedback to Rejected*

Thanks for confirming.
