

## Foreman - Bug #2718

### Subnet doesn't appear when domain and subnet is assigned to a specific location

06/26/2013 04:02 PM - Alejandro Falcon

<b>Status:</b> Rejected	
<b>Priority:</b> High	
<b>Assignee:</b>	
<b>Category:</b> Organizations and Locations	
<b>Target version:</b>	
<b>Difficulty:</b>	<b>Fixed in Releases:</b>
<b>Triaged:</b>	<b>Found in Releases:</b>
<b>Bugzilla link:</b>	<b>Red Hat JIRA:</b>
<b>Pull request:</b>	
<b>Description</b>	
Steps: I create a new location, new subnet and new domain, then assign subnet and domain to the newly created location. When I create a new host the subnet doesn't appear under that location and domain.	
When I assign the subnet and domain to all locations it works fine.	

#### History

##### #1 - 06/26/2013 04:03 PM - Alejandro Falcon

This might be related to <http://projects.theforeman.org/issues/2203> fix

##### #2 - 06/26/2013 04:05 PM - Alejandro Falcon

Forgot to say I'm using 1.2 RC3

##### #3 - 06/27/2013 02:24 AM - Ohad Levy

can you confirm that the domain is selected as part of the subnet?

##### #4 - 06/27/2013 07:12 AM - Alejandro Falcon

yes I have the domain selected for the subnet. It's weird because I have 3 locations/domains/subnets, that were all working fine before upgrading to 1.2 RC. Yesterday I was going to build one server and 2 of these locations had these issues but one of them didn't, so I tried to create a new one without luck.

I'm using Foreman with MySQL, upgraded from RPM packages.

##### #5 - 08/15/2013 08:39 AM - Anonymous

- Description updated

- Assignee set to Anonymous

##### #6 - 08/15/2013 08:56 AM - Dominic Cleal

- Category set to Organizations and Locations

- Status changed from New to Assigned

I wonder if this is the same as [#2734](#), worth double checking that it's still reproducible. We fixed this later in 1.2.1.

##### #7 - 08/15/2013 11:39 AM - Anonymous

Can't reproduce the issue as described with code from master; Will check the same with the latest release.

##### #8 - 08/15/2013 03:35 PM - Anonymous

can't reproduce the issue with Foreman 1.2.1 (on Fedora 18).

##### #9 - 08/15/2013 03:44 PM - Anonymous

- Status changed from Assigned to Rejected
