Hi

not sure if this will be aver fixed... But for me the workaround was:

Uncomment line below in

/usr/lib/ruby/gems/1.8/gems/rubyipmi-0.7.0/lib/rubyipmi/ipmitool/connection.rb file

```
@options["I"] = "lanplus"
```

IM sure you can find better solution.

Hope this help to those who need solution asap.

[#7543](#) is almost a duplicate of this issue but I think it could be considered an issue about the exception message showing up in the www UI, rather than the exception being generated in the first place.

I agree that this is just UI issue. We can display better message that may indicate that setup is wrong.
