

Foreman - Bug #27519

Job Invocations in Audit Log are not showing Affected Hosts

08/05/2019 02:12 PM - Marcel Kühlnhorn

Status:	New	
Priority:	Normal	
Assignee:		
Category:	Audit Log	
Target version:		
Difficulty:		Fixed in Releases:
Triaged:	No	Found in Releases: 1.21.3
Bugzilla link:		Red Hat JIRA:
Pull request:		

Description

Job Invocation events in the Audit Log do not show the Hosts affected by the event, the corresponding Job Invocation status page in turn doesn't show the User that triggered the action.

The only place where all relevant information is visible at the moment is the resulting Task.
