

## Katello - Bug #27538

### Organization update API documents organization as required, while it is not.

08/07/2019 01:11 PM - Evgeni Golov

<b>Status:</b> New	
<b>Priority:</b> Normal	
<b>Assignee:</b> John Mitsch	
<b>Category:</b>	
<b>Target version:</b> Katello Backlog	
<b>Difficulty:</b> trivial	<b>Fixed in Releases:</b>
<b>Triaged:</b> Yes	<b>Found in Releases:</b> Katello 3.12.0
<b>Bugzilla link:</b>	<b>Red Hat JIRA:</b>
<b>Pull request:</b>	
<b>Description</b>	
We currently document that the user needs to pass an organization Hash when updating an Org, but in reality this is not really needed when the user only wants to update the redhat_repository_url which lives outside this Hash (why that is so is a different question).

#### History

##### #1 - 08/07/2019 05:49 PM - Jonathon Turel

- Target version set to Katello Backlog
- Difficulty set to trivial
- Triaged changed from No to Yes

##### #2 - 08/22/2019 06:42 AM - Evgeni Golov

- Related to Tracker #27680: API bugs that need workarounds in foreman-ansible-modules added

##### #3 - 08/28/2019 02:50 PM - John Mitsch

- Assignee set to John Mitsch
- Triaged changed from Yes to No

I looked at this for the backlog grooming day, but going to have to dig/ask around more about why we use the Foreman Taxonomies param group rather than the one defined in that controller. The one defined in the Katello controller has the "action\_aware" argument meaning it would not be required for update, only create (and fix this issue if we use that). Assigning to myself and we will re-triage :)
