

Katello - Bug #27570

Rebuild RHEL8 with Appstream kickstart repo fails to install redhat-lsb-core and wget packages

08/09/2019 07:53 AM - Marek Hulán

Status: Rejected	
Priority: Normal	
Assignee:	
Category:	
Target version: Katello Recycle Bin	
Difficulty:	Fixed in Releases:
Triaged: Yes	Found in Releases:
Bugzilla link: 1720668	Red Hat JIRA:
Pull request:	
Description	
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1720668	
Description of problem:	
When rebuild RHEL8 again after the first build , it fails to install redhat-lsb-core and wget packages.	
Version-Release number of selected component (if applicable):	
Satellite 6.5	
How reproducible:	
100%	
Steps to Reproduce:	
1. Add the following repositories to the used content-view for provisioning and publish/promote it Red Hat Enterprise Linux 8 for x86_64 - AppStream Kickstart x86_64 8 Red Hat Enterprise Linux 8 for x86_64 - AppStream RPMs x86_64 8 Red Hat Enterprise Linux 8 for x86_64 - BaseOS RPMs x86_64 8 Red Hat Satellite Tools 6.5 for RHEL 8 x86_64 RPMs x86_64	
2. Build the RHEL8 machine. This will add the following line to the provisioning template: repo --name Red_Hat_Enterprise_Linux_8_for_x86_64_-_AppStream_Kickstart_x86_64_8 --baseurl http://[SAT-NAME]/pulp/repos/Dorganization/Library/RHEL8-Provisioning/content/dist/rhel8/8/x86_64/appstream/kickstart/	
3. After the rebuild is finished, try to rebuild the machine again.	
Actual results:	
1. The following line is now added to the provisioning template : repo --name Red_Hat_Enterprise_Linux_8_for_x86_64_-_AppStream_Kickstart_x86_64_8 --baseurl http://[SAT-NAME]/pulp/repos/Dorganization/Library/RHEL8-Provisioning/content/dist/rhel8/8/x86_64/appstream/kickstart/	
2. Fails on redhat-lsb-core and wget packages installation	
Expected results:	
Not to fail	
Additional info:	
Workaround has been applied by the customer by cloning the original template and hard-coded the missing line on it and use it instead of the original template.
