

## Foreman - Bug #27671

### Timezone and sync plan info

08/21/2019 08:15 AM - Anonymous

<b>Description</b>	
<p>It seems that Foreman sometimes forgets to apply the timezone logic (or it shows the info in GMT without clearly indicating it). Example: I have a daily sync plan, and in the details of the plan it is marked:</p> <p>Start Date: Jul 25, 2019 2:59:00 AM Next Sync: August 22, 2019, 12:59 AM Recurring logic: 3</p> <p>(also the Sync Plan overview mentions this 12:59 AM). However, when checking the "recurring logic" it says: Last occurrence 2019-08-21 02:59:09 +0200 Next occurrence 2019-08-22 02:59:00 +0200</p> <p>And the logs also correctly show that the sync always starts at 02:59:09 +0200 My browser <b>should</b> have the correct timezone, and my account profile indicated to use the browser timezone.</p> <p>Also, the sync status shows in its overview that the sync of a repo started e.g. "about 7 hours ago". While this seems informative, it is not (I think the daytime info would be more useful).</p>
