

Smart Proxy - Bug #2768

importing classes partially fails when dynamic modulepath has multiple entries

07/10/2013 07:32 AM - David Schmitt

Description	
Hi,	
with an modulepath of the form '/srv/puppet/\$environment/modules:/srv/puppet_mac/\$environment/modules', the smart proxy will only see modules from the second component.	
Please apply the following patch to fix this:	
<pre>--- environment.rb.orig 2013-07-10 13:28:19.945539637 +0200 +++ environment.rb.fixed 2013-07-10 13:28:34.508591835 +0200 @@ -75,7 +75,7 @@ # Dynamic environments - get every directory under the modulepath Dir.glob("#{base_dir.gsub(/\\$environment(.*)/, "/") }/*").grep(/\/[A-Za-z0-9_]+\$/) do dir e = dir.split("/").last - new_env[e.to_sym] = base_dir.gsub("\$environment", e) + new_env[e.to_sym] = [new_env[e.to_sym], base_dir.gsub("\$environment", e)].flatten .reject{ d d.nil?}.join(":") end end end</pre>

This looks like [#2738](#). could you try that patch please David? (Or the foreman-proxy nightly, which will have it.)

#2 - 07/10/2013 08:38 AM - David Schmitt

Yeah, [#2738](#) definitely looks like this problem. Looking forward to 1.2.1 :-)

#3 - 07/10/2013 10:04 AM - Dominic Cleal

- Status changed from Feedback to Rejected

- Target version deleted (1.2.1)

Good, thanks for testing.
