Description

Hello,

We're hitting a serious with recent foreman (bug present with 1.22.1, upgraded to 1.23, still there).
We cannot edit some hosts anymore because the form say there's a validation error with the hostname (underlined in red, no error message, no XHR call with error, no JS console message).

I have no idea why but I think it's a severe bug... Thanks a lot for your feedback.

Network interface being configured correctly (physical host, not managed by compute resources).

Interface eno1

Type	Interface ▾
MAC Address ⓘ	b4:2e:99:1c:fe:90
Device Identifier ⓘ	eno1
DNS Name ⓘ	ryzen-video02
Domain	production.cita.local ✕ ▾
IPv4 Subnet ⓘ	TE_VIDEO_DECODER (10.13.67.128/27) ✕ ▾
IPv6 Subnet	No subnets ▾
IPv4 Address ⓘ	10.13.67.136
IPv6 Address ⓘ	
Managed ⓘ	☐
Primary ⓘ	☑
Provision ⓘ	☑
Remote execution ⓘ	☑
Virtual NIC ⓘ	☐

Unable to press Save, hostname is underlined in red

Host | Interfaces | Puppet Classes | Parameters | Additional Information

Name *	ryzen-video02.production.cita.local ⤬
