<b>Pull request:</b> <a href="https://github.com/theforeman/foreman/pull/7075">https://github.com/theforeman/foreman/pull/7075</a>	
<b>Description</b>	
<p>As part of <a href="https://github.com/theforeman/foreman_ansible/pull/299">https://github.com/theforeman/foreman_ansible/pull/299</a> I want host group titles to be available within the template and thus in the generated report.</p> <p>I'm aware of the fact that host group names are available in the safe mode, but there is no way to get the nesting, e.g. what nesting has a certain host group. The easiest way is to reuse titles (which are used in UI).</p>
