Description		
<p>This controller (api/services/api/authorization) gives you the option of using OAuth or http basic. If http basic is used but no username/password are set, foreman returns a 500 when it tries to authenticate the API request.</p> <p>Processing by Api::V1::HostsController#show as JSON Parameters: {"id"=>"host.domain.com", "host"=>{}} invalid byte sequence in UTF-8 (ArgumentError)</p>
