Foreman - Refactor #28596

Refactor # 28278 (Resolved): Remove smart variables

Remove Api::V2::LookupKeysCommonController

12/30/2019 03:04 PM - Ori Rabin

Status:	Closed		
Priority:	Normal		
Assignee:	Amir Fefer		
Category:	Parameters		
Target version:

Pull request:	https://github.com/theforeman/foreman/pull/7596		

Description

The common controller is in use for Smart Class Parameters and Smart Variables mostly to distinguish between the two so we can find the correct resource.
With Smart Variable removed most of the code can be deleted and the Smart Class Parameters part can be simplified and maybe moved to the original controller.
