Difficulty:	Fixed in Releases:
Triaged: No	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request: https://github.com/theforeman/puppet-katello/pull/313	
Description	
To support upgrading katello 3.14 to 3.15 some installer changes are needed. What i expect is:	
1. Upon fresh install: * pulp3 is installed, configured, and running with file and docker plugins * /pulp/isos directs to pulp3 for both http and https * :use_pulp_2_for_content_type: in /etc/foreman/plugins/katello.yaml does NOT have file and docker set to true	
2. When upgrading from 3.14 to 3.15: * pulp3 is installed, configured, and running with file and docker plugins * /pulp/isos directs to pulp2 for both http and https * /etc/foreman/plugins/katello.yaml contains within the katello section:	
<pre>:use_pulp_2_for_content_type: :docker: true :file: true</pre>	
3. After upgrading, there exists some installer option(s) that will convert an installation that is at 2) to 1), updating apache configs and katello configs accordingly.
